OFFICIAL PRACTICAL LAB MANUAL

HTML5 Practical Manual

Step-by-Step Hands-On Practicals with Source Code & Visual Output Previews

This practical lab manual covers fundamental HTML concept implementations including webpage layout structuring, typography, text formatting, ordered/unordered lists, hyperlinking, media embedding, tabular data organization, and interactive HTML form controls.

8 Core Practicals

Complete source code for profiles, products, lists, forms & tables.

Real Photo Examples

Includes high-resolution image rendering and realistic browser previews.

Form Input Elements

Covers radio buttons, checkboxes, dropdown select menus, & text areas.

Clean Structural Markup

Standards-compliant HTML5 tags and structured document hierarchy.

SUBJECT
Web Technology / HTML Practicals

FORMAT

Table of Contents

Index of all 8 HTML Practicals included in this manual:

CHAPTER	PRACTICAL NAME & OBJECTIVE	KEY HTML TAGS USED
Practical 1	Create a Simple Personal Profile Webpage	<h1>, <h2>, <p>
Practical 2	Create a Product Description Using Text Formatting	<b>, <i>, <u>, ,
Practical 3	Create Different Types of Lists	<ol type="1">, <ol type="A">, <ul type="disc">, <ul type="square">
Practical 4	Create a Webpage Using Hyperlinks	<a href="..."> (Internal & External)
Practical 5	Display a Product Image Using the Image Tag	<img src="..." width="..." height="..." alt="...">
Practical 6	Create an Employee Information Table	<table>, <tr>, <th>, <td>
Practical 7	Create a College Admission Registration Form	<form>, <input>, <select>, <textarea>
Practical 8	Create a Course Registration Form Using Radio Buttons, Checkboxes and Dropdown List	<input type="radio">, <input type="checkbox">, <select>

CHAPTER 1

Practical 1: Create a Simple Personal Profile Webpage

> **AIM**
> To create a simple HTML webpage displaying a personal profile using headings and paragraphs.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>My Profile</title>
</head>
<body>

    <h1>Welcome to My Profile</h1>

    <h2>About Me</h2>
    <p>My name is Rohan Sharma. I am a computer science student.</p>

    <h2>My Goal</h2>
    <p>I want to become a successful software developer.</p>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical1_profile.html

Welcome to My Profile

About Me

My name is Rohan Sharma. I am a computer science student.

My Goal

I want to become a successful software developer.

Output & Tag Explanation

This practical demonstrates basic HTML structural tags: `<h1>` for the primary main heading, `<h2>` for section subheadings, and `<p>` for text paragraphs.

CHAPTER 2

Practical 2: Create a Product Description Using Text Formatting

> **AIM**
>
> To create a webpage using different HTML text formatting tags.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>Product Details</title>
</head>
<body>

    <h1>Smartphone Store</h1>

    <p><b>Product:</b> Smart X10</p>

    <p><i>Latest smartphone with modern features.</i></p>

    <p><u>Special Offer Available</u></p>

    <p><strong>Price: ₹19,999</strong></p>

    <p><em>Limited stock available.</em></p>

    <p><b><i><u>Free delivery on selected orders</u></i></b></p>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical2_product.html

Smartphone Store

Product: Smart X10

Latest smartphone with modern features.

Special Offer Available

Price: ₹19,999

Limited stock available.

Free delivery on selected orders

Output & Tag Explanation

Illustrates text styling elements: `<b>` (bold), `<i>` (italic), `<u>` (underline), `<strong>` (semantic importance), `<em>` (emphasis), and combining formatting tags.

CHAPTER 3

Practical 3: Create Different Types of Lists

AIM

To create ordered and unordered lists for displaying real-life information.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>College Information</title>
</head>
<body>

    <h1>College Information</h1>

    <h2>Steps to Join a Course</h2>
    <ol type="1">
        <li>Choose a Course</li>
        <li>Fill the Application Form</li>
        <li>Submit Documents</li>
        <li>Complete Admission</li>
    </ol>

    <h2>Popular Programming Languages</h2>
    <ol type="A">
        <li>Python</li>
        <li>Java</li>
        <li>JavaScript</li>
        <li>C++</li>
    </ol>

    <h2>Required Stationery</h2>
    <ul type="disc">
        <li>Notebook</li>
        <li>Pen</li>
        <li>Pencil</li>
        <li>Marker</li>
    </ul>

    <h2>Available Facilities</h2>
    <ul type="square">
        <li>Library</li>
        <li>Computer Lab</li>
        <li>Sports Ground</li>
        <li>Cafeteria</li>
    </ul>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical3_lists.html

College Information

Steps to Join a Course

1. Choose a Course
2. Fill the Application Form
3. Submit Documents
4. Complete Admission

Popular Programming Languages

A. Python
B. Java
C. JavaScript
D. C++

Required Stationery

- Notebook
- Pen
- Pencil
- Marker

Available Facilities

- Library
- Computer Lab
- Sports Ground
- Cafeteria

Output & Tag Explanation

Demonstrates ordered lists (`<ol>`) with numerical (`type="1"`) and uppercase letter (`type="A"`) sequencing, as well as unordered lists (`<ul>`) with bullet styles (`type="disc"` and `type="square"`).

CHAPTER 4

Practical 4: Create a Webpage Using Hyperlinks

> **AIM**
> To create hyperlinks for navigating to external websites and internal pages.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>Student Resources</title>
</head>
<body>

    <h1>Student Resource Center</h1>

    <h2>Useful Websites</h2>

    <p>
        <a href="https://www.google.com">Open Google</a>
    </p>

    <p>
        <a href="https://www.youtube.com">Open YouTube</a>
    </p>

    <p>
        <a href="about.html">Go to About Page</a>
    </p>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical4_links.html

Student Resource Center

Useful Websites

Open Google

Open YouTube

Go to About Page

Output & Tag Explanation

Demonstrates web navigation using the anchor tag (`<a href="...">`) for absolute external web addresses (Google, YouTube) and relative internal file paths (about.html).

CHAPTER 5

Practical 5: Display a Product Image Using the Image Tag

AIM

To display an image on a webpage using the <img> tag.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>Car Showcase</title>
</head>
<body>

    <h1>Luxury Car Showcase</h1>

    <img src="https://images.unsplash.com/photo-1503376780353-7e6692767b70"
         width="400"
         height="250"
         alt="Luxury Car">

    <h2>Sports Car</h2>

    <p>
        This is a modern sports car designed for speed,
        comfort and performance.
    </p>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical5_image.html

Luxury Car Showcase

Sports Car

This is a modern sports car designed for speed, comfort and performance.

Output & Tag Explanation

Covers embedding images using the `<img>` tag: `src` for image file source, `width` and `height` for explicit dimensions, and `alt` for accessible image descriptions. (Features real sports car photograph example).

CHAPTER 6

Practical 6: Create an Employee Information Table

> **AIM**
>
> To create a table using HTML table tags such as <table>, <tr>, <th> and <td>.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>Employee Information</title>
</head>
<body>

    <h2>Company Employee Details</h2>

    <table border="1">

        <tr>
            <th>Employee ID</th>
            <th>Name</th>
            <th>Department</th>
            <th>Salary</th>
        </tr>

        <tr>
            <td>201</td>
            <td>Aman</td>
            <td>IT</td>
            <td>45000</td>
        </tr>

        <tr>
            <td>202</td>
            <td>Neha</td>
            <td>HR</td>
            <td>40000</td>
        </tr>

        <tr>
            <td>203</td>
            <td>Vikas</td>
            <td>Finance</td>
            <td>48000</td>
        </tr>

    </table>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical6_table.html

Company Employee Details

Employee ID	Name	Department	Salary
201	Aman	IT	45000
202	Neha	HR	40000
203	Vikas	Finance	48000

Output & Tag Explanation

Shows tabular data formatting using `<table border="1">`, row structure with `<tr>`, header cells with `<th>`, and data cells with `<td>`.

CHAPTER 7

Practical 7: Create a College Admission Registration Form

> **AIM**
>
> To design a student registration form using HTML form elements.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>College Admission Form</title>
</head>
<body>

    <h2>College Admission Form</h2>

    <form>

        Full Name:
        <input type="text">
        <br><br>

        Email:
        <input type="email">
        <br><br>

        Password:
        <input type="password">
        <br><br>

        Date of Birth:
        <input type="date">
        <br><br>

        Gender:
        <input type="radio" name="gender"> Male
        <input type="radio" name="gender"> Female
        <br><br>

        Course:
        <select>
            <option>CSE</option>
            <option>Cyber Security</option>
            <option>IT</option>
            <option>ECE</option>
        </select>

        <br><br>

        Address:
        <br>

        <textarea rows="4" cols="30"></textarea>

        <br><br>

        <input type="submit" value="Apply Now">
        <input type="reset" value="Reset">

    </form>

</body>
</html>
```

Rendered Output Preview

Output & Tag Explanation

Form design introducing text inputs, email validation, password fields, date selection control, radio buttons, dropdown select menus, multi-line textareas, and submit/reset buttons.

CHAPTER 8

Practical 8: Create a Course Registration Form Using Radio Buttons, Checkboxes and Dropdown List

> **AIM**
>
> To collect user information using radio buttons, checkboxes and a dropdown list.

Source Code (Program)

HTML5 SOURCE CODE

```
<!DOCTYPE html>
<html>
<head>
    <title>Online Course Registration</title>
</head>
<body>

    <h2>Online Course Registration</h2>

    <form>

        Student Name:
        <input type="text">
        <br><br>

        Gender:
        <input type="radio" name="gender"> Male
        <input type="radio" name="gender"> Female
        <br><br>

        Select Skills:
        <br>

        <input type="checkbox"> HTML
        <input type="checkbox"> CSS
        <input type="checkbox"> JavaScript
        <input type="checkbox"> Python

        <br><br>

        Select Course:

        <select>
            <option>Select Course</option>
            <option>Web Development</option>
            <option>Cyber Security</option>
            <option>Data Science</option>
            <option>Cloud Computing</option>
        </select>

        <br><br>

        <input type="submit" value="Register">

    </form>

</body>
</html>
```

Rendered Output Preview

http://localhost/practical8_course_reg.html

Online Course Registration

Student Name: Aarav Mehta

Gender: (•) Male ( ) Female

Select Skills:
[x] HTML [x] CSS [ ] JavaScript [x] Python

Select Course: Web Development

Register

Output & Tag Explanation

Demonstrates interactive form input controls including standard text inputs, exclusive option radio buttons, multi-select checkboxes for skills, options dropdown list, and registration submit button.

Practical Execution Result & Conclusion

Conclusion

Thus, the above 8 HTML programs were successfully created, tested, and verified using real-life practical examples including personal profiles, product store listings, college information, student resources center, luxury sports car showcase, company employee details, college admission forms, and course registration forms.

Key Concepts Mastered

- HTML Document Skeleton & Structure
- Typography & Text Formatting Elements
- Ordered and Unordered List Types
- Hyperlinking & Page Navigation
- Media Embedding (Images & Dimensions)
- Structured Data Formatting with Tables
- User Input Collection via HTML Forms

Verification Signature

Instructor / Evaluator Signature
